Foamies Protective Eyewear

Foamies provide effective infection control & a high level of patient comfort

Foamies don't slide around or fall back over the forehead or slip sideways when the patient turns their head.

Soft Foam Edge
Does not dig into the nose or leave marks.

Foam contours and seals around across the cheeks - protects the eyes from splash and particles.

No Irritated Eyelashes
12mm foam periphery provides adequate eyelash space. Foamies can also be worn over most prescription eye wear.

Crossflow Ventilation
Open sides allow air to flow across face while maintaining full protection.

Comfortable Earloops
Elastic foam creates slight tension without hard edges and it compresses when the head turns to the side.
